

Environmental Policy of Hôtel l'Elysée Val d'Europe

1. Our Environmental Commitment

Hôtel l'Elysée Val d'Europe has been committed for several years to a voluntary and structured environmental approach, recognized by several labels (B Corp, Green Key and now the EU Ecolabel).

This certification demonstrates our ongoing dedication to sustainable development and our desire to act responsibly to preserve natural resources.

2. Continuous Improvement and Impact Management

Aware of the environmental footprint linked to our activity, we are committed to continuously improving our environmental performance. To achieve this, we regularly monitor our consumption, reduce waste, optimize our equipment, promote renewable energies, and constantly seek solutions to limit our impact on water, energy, air, and soil.

3. Priority Objectives for the Year

As part of our action plan, we set new goals every year as outlined in our CSR report. Our priorities include:

- Further reducing our water and energy consumption through monthly meter tracking and equipment optimization.
- **Strengthening waste reduction and sorting**, particularly through the use of responsible packaging, composting, and recovery in partnership with local and specialized channels.

We are committed to maintaining and expanding the initiatives already in place, including:

- The use of energy-efficient equipment and smart-room technologies.
- Responsible purchasing, with a focus on local, organic, fair-trade, and eco-designed products.
- Local and community-based actions
- Ongoing awareness initiatives for our teams, guests, and suppliers through internal actions, displays, and training.

4. A Collaborative Approach

We warmly thank our guests, partners, and employees who contribute every day to this initiative. Together, we can protect the environment and promote respectful, sustainable practices. We invite everyone to support our commitments by adopting simple yet essential gestures—both within the hotel and in daily life—to help protect our planet.
